

# 100G of EPON equipment in stock in Namibia

## Article Overview

100G-capable EPON equipment can be sourced for Namibia through international suppliers, with some devices available for pre-order and shipment.

## Local and Regional Options

Currently, there is no confirmed stock of 100G EPON equipment physically located in Namibia, but several suppliers provide options for delivery:

- o Gcom.ge offers EPON OLTs with 100G uplink ports, such as the FC6200-X2 32XG (S)-PON with 4100G uplinks, available by pre-order .
- o FS.com lists high-capacity OLTs including models with 100G QSFP28 uplink ports, suitable for large-scale deployments .
- o Alibaba and other global distributors provide EPON OLTs, ONUs, and SFP modules compatible with 100G networks, which can be shipped to Namibia .

## Considerations for Procurement

- o Pre-order and lead times: Many 100G-capable devices are available on a pre-order basis, so planning ahead is essential.
- o Local support: While international suppliers can ship to Namibia, consider local technical support for installation and maintenance.
- o Network compatibility: Ensure that the OLT, ONUs, and SFP modules are compatible with your existing EPON infrastructure and support 100G uplinks.
- o Customs and import regulations: Importing high-capacity networking equipment may require compliance with Namibian customs and telecommunications regulations.

## Alternative Approaches

- o Local distributors: While companies like Megabuild and EPC Namibia focus on hardware and industrial equipment, they may provide contacts or facilitate procurement of specialized telecom equipment .
- o Government tenders and e-procurement: Namibia's eProcurement portal and tender platforms may list opportunities to source EPON equipment for public projects, which could include 100G-capable devices .

## Recommendation

For immediate deployment, the most practical approach is to contact international suppliers like Gcom.ge or

## 100G of EPON equipment in stock in Namibia

FS.com to place pre-orders for 100G EPON OLTs and modules, while simultaneously exploring local agents or procurement services in Namibia to handle import, installation, and support. This ensures access to high-capacity EPON equipment without long delays and aligns with local regulatory requirements.
