

24-port cable management rack no drilling required

Article Overview

You can use a 1U 24-slot horizontal cable management rack that mounts to standard 19-inch racks using included screws, requiring no drilling.

Key Features

- o Easy Installation: Many 24-port cable managers, such as the VCELINK 1U model, allow installation in under 90 seconds using the included screws and nuts, without the need for drilling or professional tools, making them ideal for busy IT teams or temporary setups (VCELINK) .
- o High Capacity: These racks feature 24 slots to separate and route multiple cables, reducing clutter and improving airflow in server racks or network cabinets .
- o Durable Construction: Made from cold-rolled steel or high-quality metal, these racks are resistant to rust and oxidation, with anti-scratch designs to protect cables during installation or maintenance .
- o Compatibility: Designed for all standard 19-inch racks, horizontal cable managers fit between network components and equipment, and some include covers to hide cables for a clean, professional look .
- o Cable Organization: Side slots or zoned designs allow grouping of cables for easier maintenance, reducing strain and improving performance .

Installation Considerations

- o Ensure front clearance between the rack rails and any cabinet doors to accommodate the cable manager .
- o Most kits include all necessary mounting hardware, so no additional tools or modifications are required .

Additional Options

- o Neat-Patch 1U and 2U cable managers support 24-48 patch cables and provide zero-slack routing, improving airflow and serviceability in high-density racks .
- o Flexible or hybrid designs are available for dynamic environments, allowing quick access and reconfiguration without permanent installation . These solutions are ideal for server rooms, data centers, or office IT racks where you want professional cable management without drilling or permanent modifications.

Choose from a huge selection of DVI splitters! Affordable 19 inch Metal Cable Manager 24-port Network
