

Connecting cable tray nuts

Preview

Splice plates are the most widely used method for connecting cable tray sections in straight runs. We fix them with nuts and bolts through the holes in the plate and the tray sides. Choosing the right one depends on project conditions, load, maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Securing the Flow ? | Connecting Two Cable Trays Like a Pro ???? Watch how we link trays seamlessly with connectors, bolts, and nuts. #CableManagementDoneRight #CableTray #Electri. These fittings can only be screwed on.
