

Does Albania have 100 Mbps and 1 Gbps systems

Preview

The National Broadband Plan 2020-2025 targets 100% broadband coverage by 2025, 50% of urban connections at 1 Gbps, and 100% rural access at least 100 Mbps by 2025, including 1 Gbps links to all schools and health centers by 2025. In the late 2010s, DSL accounted for around 39% of connections while FTTH/B totaled about 31%, and today fiber is expanding with gigabit plans up to 1 Gbps in urban areas such as those marketed by Vodafone Albania after acquiring Abcom. About 90% of fixed-line subscriptions are in urban zones, with. By 2025, Albania's internet infrastructure improved significantly, boosting fixed broadband speeds to a median of 82. Fiber-to-the-home (FTTH) networks expanded in cities like Tirana and Durrës, offering gigabit speeds, while 5G services launched in. In July 2025, a team of Japanese scientists established a new world record for internet speed: 125,000 gigabytes per second. This is, however, millions of times faster than the average connection speed in Japan (or anywhere else in the world). Connectivity for all schools and hospitals at high-speed rates (1 Gbps). Free. In Albania, you can usually choose between fiber-based fixed broadband (often the most stable option where available) and mobile data-based home internet (a flexible alternative when fiber is not available or when you want quick self-installation). Packages are commonly priced in ALL (Albanian lek). Albania saw significant developments as a result of its first National Broadband Plan (NBP) from 2013, which provides a set of directions and goals to be undertaken by the government, public agencies, and other regulatory agencies for the 2013-2020 period. The NBP for the 2013-2020 period was.

Albania has come a long way in preparing and fostering digital transformation of its economy and institutional and administrative organization.

Everybody's talking about gigabit internet. But what difference will it make to choose mbps vs gbps? Find out what it means for your internet

As of 2023, about 90.4% of Albanian households have fixed broadband access, up from 58% in 2019. In the late 2010s, DSL accounted for

Internet Society gives Albania an overall Internet resilience score of 59%, which means it has medium capacity to withstand unexpected faults or challenges to normal operation.
