

Article Overview

Leading manufacturers of network and server cabinets in the Netherlands include Schneider Electric, Norden Communication, Legrand, and Hammond Manufacturing.

Key Manufacturers

Schneider Electric Netherlands offers a wide range of server and network racks suitable for data centers, server rooms, offices, and industrial environments. Their product line includes APC NetShelter enclosures, wall-mount racks, soundproof racks, and micro data centers, providing both open and enclosed solutions for various IT and networking needs (Schneider Electric Netherlands) .

Norden Communication is a prominent Dutch manufacturer and supplier of cabinets and accessories. They provide standard and customized network cabinets, focusing on quality and competitive pricing for local and regional clients (Norden Communication) .

Legrand provides server and network cabinets under the Minkels and Nexpan platforms. Their cabinets are designed for high-density cabling, energy-efficient operation, and flexible configuration. Legrand offers pre-configured cabinets as well as customizable options with accessories for cable management, airflow optimization, and PDU mounting (Legrand) .

Hammond Manufacturing specializes in industrial and electronic enclosures, racks, and rack cabinets. Their products include climate-controlled enclosures, outlet strips, and transformers, catering to both industrial and IT networking applications (Hammond Manufacturing) .

Considerations for Selection

When choosing a network cabinet manufacturer in the Netherlands, consider:

- o Cabinet type: server cabinets for blade servers and storage, or network cabinets for high-density cabling.
- o Customization: options for height, width, depth, and accessories.
- o Energy efficiency: airflow management and cooling solutions.
- o Local support: availability of installation, maintenance, and warranty services.

These manufacturers provide a comprehensive range of solutions for standard network cabinet requirements, from small office setups to large-scale data centers.
