Fire Putty is a silicone-based, non-hardening fire putty for cable and pipe penetrations. The KBS (R) fire protection portfolio includes a wide range of fire protection products of the highest quality that reliably prevent the spread of fire in an emergency and thus permanently meet building code requirements. For almost 70 years, new concepts and systems for preventive fire protection. Fire protection putty ? Large product range ? Fast delivery ? Purchase on account ? For trade customers only ? Buy from Wurth! Ready-to-use fire protection putty is an easy-to-use, fireproof and sound-insulating sealant that remains flexible and does not harden after application. In case of fire, a blockade of fire-resistant filler is formed that restricts the passage of smoke and fire.

Our range of trunking and cable tray protection products provide effective fire protection for pipes, cables and trunking within floors, walls and ceilings.

Whether you need to firestop outlet boxes or small cable penetrations, you will find the solution here - our quick to install putty pads, putty sticks and cable discs.

1) The intended use of Protecta FR Putty is to reinstate the fire resistance performance of flexible, masonry or concrete walls and rigid floor constructions where they are penetrated by insulated or

A flexible intumescent putty, ideal for use around copper pipes or cables, and around steel electrical trunking. Unaffected by moisture.

The DG-CR 0.7 system is an intumescent fire protection bandage for cable systems. It prevents ignition or flame propagation and ensures functional integrity for

Essential guide to explosion proof Cable Trays in Chemical Plants. Learn about tray zoning, materials, design, installation, & safety for hazardous

Explore the importance of fire-resistant cable trays in high-risk environments. Learn about the best materials and practices to ensure maximum

Key attributes Usage Construction, Fiber & Garment, Cable Terminals and Connectors Main Raw Material Organic Plugging Material Place of Origin China Other Names Plugging Materials Type

Intumescent fire protection putty for use in system D2.1 Fire protection sealant for small cable penetration sealing work in solid walls, solid ceilings and non-load bearing partitions

EU Fireproof Putty for Cable Trays

3MTM Fire Barrier Moldable Putty+ consists of a synthetic elastomer designed for use as a one part, intumescent fire resistive putty used to restore the integrity of fire rated building construction.

Fire Putty is intended for fire sealing in fire class EI 60 to EI 120 of cables and metal pipes in wall structures. It is ideal for single penetrations where a simple and cost

Fire protection solutions to protect cables, cable trays and cable systems. Discover our tested cable coatings and fire protection bandages!

Non-setting Putty Quick Overview NS Fire#174; Putty is a solvent free putty for fire barriers up to 4 hours. It is designed as a joint filler and sealer for use in

1. Route Planning and Layout Principles Coordinate with Building Structure: Cable tray routing should align with architectural design, avoiding unnecessary

Cable penetrations and fire safety There are many different types of cables and cable penetrations that can pass through fire compartment walls. For example,

Fire protection for cables and cable trays: effective solutions to prevent cable fires Cable systems are found in all buildings nowadays: from industrial plants via
