

Fixed distribution box for main circuit breaker

Preview

A fixed power distribution box designed for your loads, clearly labeled, code-compliant, and easy to service. A fixed power distribution box --also called a distribution board, switchboard, or remote power panel (RPP)--safely routes utility or UPS power to branch circuit. A distribution box, also known as a distribution board, electrical panel, or breaker box, is an enclosure that houses electrical components responsible for distributing electricity throughout a building. It is a vital part and central hub of any electrical system. The hub distributes electrical power from a single input source to various circuits throughout a building.

Key Takeaways A distribution board safely distributes electrical power from a main source to various circuits and areas within a building. There are 10
