

Article Overview

ITEC Groupe, ABB France, Circe Technologies, and Sonepar are leading French providers of complete low-voltage equipment and solutions.

ITEC Groupe

ITEC Groupe is a nationally recognized French company specializing in the consulting, design, integration, and production of low-voltage switchgear, controlgear assemblies, main switchboards, cabinets, and electrical panels for industry, infrastructure, and service sectors . They offer tailor-made solutions, with a design office that manages technical files and interfaces with production workshops. Their teams ensure that each product is normatively controlled and adapted to customer requirements, making them a strong choice for customized low-voltage installations .

ABB France

ABB France provides a comprehensive portfolio of low-voltage products, including electrical distribution and switching solutions, smart switchgear, and monitoring systems . ABB focuses on reliable and high-efficiency electrical protection, supporting industries, commercial buildings, and infrastructure projects. Their solutions include smart upgrades for existing installations, transfer switching systems for continuous power supply, and digital monitoring tools to optimize energy management and operational efficiency .

Circe Technologies

Circe Technologies specializes in the design and manufacturing of winding products and customized systems, including single-phase and three-phase transformers, autotransformers, DC power supplies, and inductors . They offer both standard and tailor-made solutions, with options for housing, eco-design, and integrated systems. Circe is suitable for projects requiring high-efficiency transformers and complete electrical functions customized to specific technical constraints .

Sonepar France

Sonepar is a major distributor of electrical products and solutions in France, providing a wide range of low-voltage equipment, automation components, and technical services . They support installers and industrial customers with consulting, product supply, and specialized solutions for residential, commercial, and industrial applications. Sonepar also has a strong presence in overseas French territories, offering local expertise for installation projects .

Summary

For a complete low-voltage solution in France, these companies offer complementary strengths:

- o ITEC Groupe: Custom switchgear and panels with full design and production support.
- o ABB France: Integrated low-voltage systems, smart switchgear, and energy management solutions.
- o Circe Technologies: High-efficiency transformers and customized electrical systems.
- o Sonepar: Broad distribution network and technical support for low-voltage installations. These companies collectively cover design, manufacturing, integration, and distribution, making them suitable for industrial, commercial, and infrastructure low-voltage projects in France.

RTE has contracted with five suppliers - Prysmian, Nexans, NKT-SolidAl and Hellenic Cables - to secure underground
