

High-Precision Solutions for Swiss Solar Communication Systems

Preview

Solar Communications offers to its clients a vast range of the most advanced technology solutions, such as: multiple redundant connections and equipment, carrier grade uplinks to the Internet, reliable DDoS protection, cloud hosting, and more. The kit iWin is a photovoltaic venetian-blind shading device that is integrated inside an insulating window (double glazing unit). It allows to combine in one single element different functionalities adding value to construction elements nowadays necessary: renewable energy production (useful for. Empowering the Swiss Energy Transition with High-Precision Solar Solutions & Alpine-Ready Infrastructure Switzerland is currently undergoing a historic shift in its energy paradigm. Under the Energy Strategy 2050, the nation is aggressively phasing out nuclear power in favor of renewable sources. Through advanced metering infrastructure, data analytics, and secure grid technologies, we help organizations improve operational efficiency, enhance reliability, and accelerate digital. CSEM is a public-private, non-profit Swiss technology innovation center. We believe in a future that is imagined, shared, and created TOGETHER. At CSEM, we don't just. SwissMade.
