This is a power monitoring device, designed to track and record the power quality and operational status of equipment in real time. The Phase A, B, and C indicator lights provide a clear view of whether the voltage and current parameters of the three-phase power are within normal. Ensure maximum resilience, efficiency and sustainability with Siemens' digitally supported smart power distribution for reliable power supply. Smart power distribution is Siemens' holistic offering for intelligent, digitally supported power distribution that ensures maximum resilience, efficiency. Power distribution cabinet is usually composed of cabinet, bus system, circuit breaker, switch, fuse, indicator light, instrument, transformer and various protection and control components. 1000+ models with individual outlet switching, metering, and 400V power distribution. The Morgan Multiform(TM) GRP range offers. Overview: PLS-DP series of intelligent precision power distribution Cabinet series products include: power, UPS input, output, counter, three varieties of Cabinet.
