

How much does a fireproof cable tray cost in France

Article Overview

Fireproof cable trays in France typically cost between EUR50 and EUR200 per meter, depending on type, material, and fire rating.

Price Overview

The cost of a fireproof cable tray varies based on several factors:

- o Type of tray: Wire mesh trays (like Cablofil) are generally more flexible and cost-effective, while ladder or solid-bottom trays are heavier and more expensive .
- o Material: Stainless steel (316L or 304L) and galvanized steel are common for fire-resistant trays, with stainless steel being more costly .
- o Fire rating: Certified trays (E30/E90, IEC 61 537) designed to maintain integrity during fire events are priced higher due to additional coatings or structural reinforcements .
- o Length and accessories: Prices increase with longer runs, bends, junctions, and support systems like brackets or hangers . Typical market prices in France are approximately:
- o Wire mesh fireproof trays: EUR50-EUR120 per meter
- o Ladder or solid-bottom fireproof trays: EUR100-EUR200 per meter
- o Fire protection coatings or tapes (for additional fireproofing of standard trays): EUR10-EUR30 per meter

Suppliers in France

Several reputable suppliers provide fireproof cable trays:

- o Cablofil (Legrand Group): Offers wire mesh trays certified E30/E90, suitable for industrial and commercial installations .
- o Niedax France: Specializes in mechanical and electromagnetic protection systems, including fire-resistant trays for major projects .
- o Flamro: Provides fire protection coatings and tapes for cable trays, enhancing fire resistance in sensitive environments like hospitals or power plants .
- o EAE Electric and Gewiss: Offer ladder and solid-bottom trays with high durability and fire protection for industrial applications .

Additional Considerations

- o Installation costs: Labor and mounting hardware can add 20-40% to the material cost.
- o Project scale: Bulk orders for large industrial or infrastructure projects may reduce per-meter costs.

How much does a fireproof cable tray cost in France

o Compliance: Ensure trays meet French and European fire safety standards (e.g., IEC 61 537, E30/E90) for legal and insurance purposes . For precise pricing, it is recommended to contact suppliers directly with your project specifications, as stock availability and customization can affect costs .
