

How much does cable tray mesh cost in Hungary

Article Overview

Mesh cable trays in Hungary typically range from EUR2 to EUR25 per meter, depending on material, coating, and supplier.

Price Range and Factors

The cost of mesh cable trays varies widely based on material, size, surface finish, and supplier. Common materials include:

- o Galvanized steel: Affordable and durable, suitable for most indoor applications.
- o Stainless steel: Higher cost, used in corrosive or hygienic environments.
- o Aluminum: Lightweight and rust-resistant, moderately expensive.
- o Plastic or GRP: Budget-friendly, but limited to light loads or specialized environments . Wire mesh trays are generally cheaper than ladder or perforated trays, making them ideal for lightweight wiring projects. Prices per meter can range from EUR2 for basic pre-galvanized steel trays to EUR25 for stainless steel or coated trays . Bulk orders or project-specific purchases may reduce the per-meter cost.

Local Suppliers in Hungary

Several suppliers provide mesh cable trays in Hungary:

- o AVIUS.hu offers metal-free and GRP trays for specialized applications .
- o Supermarket Rack / Micro Sheet Crafts supplies a wide range of cable trays, including customizable options, at competitive market prices .

Additional Cost Considerations

- o Coating and corrosion protection: Hot-dip galvanized (HDG) trays cost more than pre-galvanized but last longer outdoors. Powder-coated trays add durability and color options .
- o Installation labor: Mesh trays are faster to install than conduit, potentially saving 40-60% of labor costs .
- o Shipping and handling: Heavier trays increase transport costs, especially for stainless steel or large orders .

Summary

For a standard mesh cable tray in Hungary, expect EUR2-EUR25 per meter, with the final cost influenced by material, coating, size, and installation requirements. For precise pricing, contacting local suppliers like AVIUS.hu or Micro Sheet Crafts with your specifications is recommended .
