

How to fix the reinforcing core of the optical distribution box

Preview

Take the metal reinforced core about 85mm in length from the stripped position of the optical cable, cut off the rest, and fix the metal reinforced core on the steel wire fixing seat, and tighten the optical cable with a hose clamp to make it stable. (2)Cut off the end of the optical cable about 1m long. It is designed for either pre-connectorized cables or field splicing of Pigtails Outer Dimensions: 390H x 340W x 165D. This instruction describes the installation of the Fiber Distribution Frame (FDF) manufactured by Corning Optical Communications. Representing <5% of a typical IT project investment, high density, performance, and quality are pivotal attributes for an ODF ensuring business continuity 24/7/365. This article includes the following: 1. Box installation and fixed splitter distribution box 4. Install. Optical distribution frames (ODF's) are an all-important network element at the heart of this fiber network.
