

How to hide the router in fiber optic cable

Preview

Place the modem and router in a wicker basket, metal laser-cut box, or cable organizer to keep the modem and router out of sight. If the router is in a highly visible area, you can rearrange furniture, add plants, or set out framed photos to cover the modem and router. One popular solution is FTTR, also known as Fiber to the Room. FTTR brings optical fiber closer to each room, helping improve broadband stability, reduce Wi-Fi dead zones, and support high-speed internet access across larger indoor spaces. However, one common problem remains: how can installers run. Wi-Fi routers often clash with home decor, standing out as eyesores in otherwise stylish spaces. Read on to get inspired and figure out the best way to hide your equipment. If you have seen my Pinterest, you'll know how much I love hiding unsightly electronic products - I have a dedicated board called " Smart Home Ideas ". Since I know I. How to hide it? Hiding a wi-fi router most of us go traditional way: put it into a pantry, a walk-in closet or some other not very often visited space. But what if you have very thick wall and the signal is blocked or too weak? What if you have a very large home and the signal doesn't come where. So, you may be wondering, where are the best places to hide your router? Keep reading for some inventive ways we've found to hide your modem or router without sacrificing its performance. Hide Your Router in a Wicker Basket.
