

How to install an indoor terminal box

Preview

Learn how to install a fiber optic termination box step-by-step for FTTH projects. Covers mounting, splicing, routing, labeling, and testing for indoor/outdoor use. If you do not have relevant experience and skills, it is recommended to ask a professional to install it. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. Optical fiber terminal boxes can be of many different types: Straight-through Terminal Box: This terminal box has a single external hole for the receiving line. A terminal box can be divided into 2 in, 8 out, 4. There is probably no way to generalize on the installation process for FTTx since every system is unique and, in some cases, every subscriber is different.
