

How to test fiber optic cable spools

Preview

The three standard methods for testing fiber optic cabling are a visible light source, power meter and light source, and optical time domain reflectometer (OTDR). Fiber Optic Testing is used to evaluate the performance of fiber optic components, cable plants and systems. Related: Fiber Optic Connectors - Identification Guide Regularly testing fiber optic cables helps minimize network downtime, lengthens the network's longevity, reduces maintenance. Learn all about fiber testing including testing fiber for optical loss and optical speed as well as fiber testing best practices and procedures.

OptiConcepts Compact Fiber Spools(TM) provide an optimum solution when custom lengths of optical fiber are needed. Compact Fiber
