

Article Overview

Metal cable trays in Jordan are supplied and installed by specialized companies like MASEICO, Munir Al Ali & Sons, Tarkibat Construction, and Davos, following international standards for industrial, commercial, and data center projects.

Key Suppliers and Manufacturers

- o MASEICO: A leading Jordanian manufacturer of cable trays, ladders, and supporting materials. Their products comply with NEMA, BS, and IEC standards, ensuring durability, load capacity, and ease of installation. MASEICO provides custom solutions for industrial, petrochemical, power, and oil & gas projects, with factory production and storage facilities in Amman to handle large-scale deliveries and bulk projects .
- o Munir Al Ali & Sons: Offers supply and installation of cable trays and all types of cable management systems, including low and medium voltage cables, communication networks, and data networks. They also provide technical terminations and electrical network installations for industrial and commercial projects .
- o Tarkibat Construction Co. LLC: Specializes in electro-mechanical construction, including the replacement and installation of cable tray systems. They emphasize project scheduling, quality supervision, and adherence to health, safety, and environmental standards. An example project includes the replacement of cable trays at Arab Potash Company in Amman .
- o Davos for Electrical Systems & Supplies: Supplies full cable management solutions, including steel conduits, bus bar trunking systems, and cable tray support systems. They focus on critical infrastructure like data centers, offering flexible layouts and power distribution without disrupting operations .

Installation Considerations

- o Standards Compliance: Ensure all cable trays meet international standards (NEMA, BS, IEC) for load capacity, grounding, and fire safety.
- o Project Planning: Detailed scheduling, resource allocation, and supervision are essential for timely completion, especially in industrial or large commercial projects .
- o Customization: Many suppliers, like MASEICO, provide custom-designed trays to fit site-specific conditions, including solar installations or hazardous areas .
- o Integration: Cable trays must accommodate low and medium voltage cables, communication lines, and data networks, with proper dressing and terminations to ensure safety and functionality .
- o Safety and Quality: Installation should follow HSE practices, with proper grounding, support spacing, and secure mounting to prevent mechanical or electrical hazards .

Conclusion

For projects in Jordan, metal cable tray installation is supported by experienced local manufacturers and
