Likely indicates serious arcing or failing insulation. Never use conductive tools inside live panels! Vibration Detective: Place your fingertips lightly on the panel cover (never inside!). A septic distribution box (D-box) is a concrete or plastic junction that evenly distributes wastewater from your septic tank to all drainfield lateral lines. Fixes range from jetting clogged outlets. Distribution boxes are the unsung heroes of our electrical systems, quietly managing power until something goes wrong. When they start tripping, overheating, or making strange noises, it's more than just an inconvenience - it's your home's cry for help. You might have even experienced backups in the system.
