

Article Overview

Key manufacturers and suppliers of power distribution equipment in Mauritania include Machineequipments, ElecPlus, PBS, and Alwadiyan Group.

Leading Manufacturers and Suppliers

Machineequipments is a prominent manufacturer and supplier of power distribution equipment in Mauritania, offering a wide range of products for bulk and industrial applications. They are known for providing reliable, world-class power distribution solutions and can be contacted via email at sales@machineequipments.com for inquiries or bulk orders. ElecPlus specializes in the distribution of medium and low voltage electrical equipment, including MT/BT substations and low voltage networks. They collaborate with top international manufacturers to supply high-quality, standards-compliant equipment. ElecPlus also provides technical support, project realization, and after-sales service, making them a comprehensive partner for electrical infrastructure projects. PBS (Poteaux Beton du Sahel), based in Nouakchott, focuses on electrical infrastructure components, including poles and distribution-related equipment. Their modern facilities cover a production area of 10,700 m² with a capacity of 15,000 units per year, supporting the needs of Mauritania's power distribution sector. Alwadiyan Group is a diversified Mauritanian company providing energy solutions, including power distribution systems. They are recognized for innovative approaches and regional partnerships, serving both local and subregional markets.

Additional Options

For specialized applications such as data centers or industrial setups, Mauritania power strips and PDU units are available, manufactured to local standards and suitable for surface mount, rack mount, and general-purpose applications.

Summary

Mauritania has a growing network of power distribution equipment manufacturers and suppliers capable of serving industrial, commercial, and infrastructure projects. Companies like Machineequipments, ElecPlus, PBS, and Alwadiyan Group offer a combination of manufacturing, distribution, and technical support, ensuring compliance with international standards and local requirements. These firms are suitable points of contact for sourcing power distribution boxes, PDUs, and related electrical infrastructure components.
