

Mozambique Green Energy Internet Project

Preview

Funded by the Green Climate Fund (GCF) and jointly implemented by Enabel (the Belgian Agency for International Cooperation), Sustainable Energy for All (SEforALL) and FUNAE (Mozambique National Energy Fund), the initiative will expand energy access, strengthen rural. Funded by the Green Climate Fund (GCF) and jointly implemented by Enabel (the Belgian Agency for International Cooperation), Sustainable Energy for All (SEforALL) and FUNAE (Mozambique National Energy Fund), the initiative will expand energy access, strengthen rural. The objective of the Green Energy Corridors Project for Mozambique is to strengthen the electricity network and increase regional powertrade. WASHINGTON, March 21, 2025-- The World Bank Board of Directors has approved the Accelerating Sustainable & Clean Energy Access Transformation (ASCENT) in Mozambique project, aimed at accelerating sustainable energy access across Mozambique. Mozambique faces recurrent droughts, floods, cyclones, and rising temperatures that disproportionately affect rural and low-income communities. Mozambique can become one of Africa's leaders in clean energy production and is on track to meet its 2030 universal electrification target. Expected total energy-transition investment between 2024-2050: USD 80 billion Current share of renewables in total power generation: 70% Expected share of. Mozambique stands at a pivotal moment in its energy journey, leveraging abundant natural resources to pioneer a green energy revolution. The country's strategic shift toward renewable energy is reshaping its economic landscape while addressing critical power needs across the region.

The World Bank approved today a \$300 million grant from the International Development Association (IDA) that will
