

Multimode fiber optic cable available for direct wholesale

Article Overview

Multimode fiber optic cables are widely available for wholesale in various types, lengths, and specifications suitable for high-speed data transmission.

Supplier Options and Cable Types

CableWholesale offers a broad selection of 62.5/125 and 50/125 multimode fiber cables in bulk, including duplex configurations for bi-directional data transfer. They provide lengths from 1 to 30 meters, multiple color options, and connectors such as SC, ST, LC duplex, and MTRJ. Bulk orders qualify for free shipping and technical support, and custom orders can be arranged to meet specific budget or application needs. Their cables are backed by a lifetime warranty and price-matching on similar specifications. WholeSaleCables.com supplies OM2 50/125 multimode fiber with LC/LC connectors, ideal for fast Ethernet, gigabit Ethernet, and data center applications. Their bulk spools (e.g., 1000 feet) are suitable for short-range runs at 10 Gigabit speeds. These cables are riser-rated (OFNR/CMR), UL-rated, RoHS compliant, and optimized for 850nm or 1300nm wavelengths. trueCABLE provides OM4 multimode fiber in 1000ft reels, supporting 10 Gb/s data transmission over distances up to 550 meters. Options include indoor/outdoor use, plenum-rated (OFNP), and low smoke zero halogen (LSZH) jackets. Their collection is designed for data centers, campuses, and high-speed network environments, with detailed spec sheets and compatible accessories available. Mouser Electronics offers multimode fiber optic cables priced per foot, including chainflex CFLG TPE 62 cables, suitable for industrial and commercial installations. Bulk pricing and shipping options are available, though tariffs may apply for U.S. shipments.

Key Considerations for Wholesale Purchases

- o Fiber Type: Choose between 50/125 (OM2/OM3/OM4) for higher bandwidth or 62.5/125 for legacy systems.
- o Connector Type: SC, ST, LC, or MTRJ depending on network equipment.
- o Application: Short-range (multimode) vs. long-range (singlemode) data transmission.
- o Jacket Rating: Indoor, outdoor, plenum (OFNP), riser (OFNR/CMR), or LSZH for safety and compliance.
- o Reel Length: Bulk spools (1000ft or more) are cost-effective for large installations. These suppliers provide reliable options for high-volume, high-speed data transfer projects, with technical support and customization available to meet specific network requirements.

Shop our diverse range of bulk fiber optic cables, tailored for various networking needs. We provide both single-mode and multimode

Multimode fiber optic cable available for direct wholesale

FS provides multiple fiber optic cable types and cabling solutions proven in the demo scenario lab to ensure reliable high-speed
