

North Asia 24-core Smart Building Fiber Optic Cable System

Preview

Scheduled to begin operations in 2028, the cable system will be one of the first in the Asia-Pacific region to use a 24-fiber pair cable, to support infrastructure expansion and secure redundant routes to meet the increasing demand for data communications driven by 5G and AI. The Candle submarine cable system is a 24-fiber pair, 8,000 km submarine cable system connecting Japan, Taiwan, the Philippines, Indonesia, Malaysia, and Singapore, scheduled to begin operations in 2028.

Find latest news from every corner of the globe at Reuters.com, your online source for breaking international news coverage.

Candle will deploy 24 fiber pairs, above the typical 16-20 fiber pairs seen in most systems, to deliver higher capacity and lower latency across Asia.

As we enter an era where AI is being fully implemented, the importance of international submarine cables connecting not only Japan and the United States but also major parts of Asia as
