

# Price of Double-Layer Electrical Cable Trays

## Article Overview

Double-layer electrical cable trays typically cost more than standard single-layer trays, with prices influenced by material, size, and configuration.

## Pricing Overview

The cost of double-layer cable trays depends on several factors:

- o **Material:** Hot-dip galvanized steel, stainless steel, or aluminum are common. Stainless steel and aluminum are more expensive due to corrosion resistance and durability .
- o **Type and Design:** Ladder-type trays, wire mesh (basket) trays, and perforated trays vary in price. Wire mesh trays are generally lighter and more affordable, while ladder-type trays can support heavier cables .
- o **Length and Dimensions:** Standard lengths are usually 2.4 meters. Double-layer trays may require additional width and height, increasing material costs .
- o **Installation Complexity:** Double-layer trays may require more fittings, supports, and labor, which adds to the total project cost .

## Estimated Price Range

While exact prices vary by supplier and region, typical ranges for double-layer cable trays are:

- o **Hot-dip galvanized steel ladder trays:** Approximately \$50-\$120 per 2.4-meter section, depending on width and load capacity .
- o **Wire mesh (basket) trays:** Around \$40-\$90 per 2.4-meter section, suitable for lighter cables or data cabling .
- o **Stainless steel or specialized coatings:** Can exceed \$150 per section for high-corrosion environments .

## Cost-Saving Considerations

- o Using modular designs allows easier expansion without replacing the entire tray system .
- o Open-frame trays reduce labor costs compared to conduit systems, as cables can be laid directly without pulling through pipes .
- o Combining single and double-layer trays strategically can optimize both cost and cable management efficiency. For precise pricing, it is recommended to request a quotation from suppliers like Bahra Electric, McMaster-Carr, or local distributors, specifying the material, dimensions, and load requirements . This ensures the quote reflects both the product and installation costs for your project.

# Price of Double-Layer Electrical Cable Trays

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Cable trays for industrial and marine use. Includes distribution trays, cable routes and NATO-type models. Request a quote directly

Fast installation with dependable support. Everything you need to build a cable management system, including Cablofil wire mesh

Cable tray installation cost per meter varies by specifications; GangLong Fiberglass offers kits for raised floor system

These trays, meeting sector-specific needs with a robust structure, feature a covered design, interlocking splicing options, and wire

When fitting cable trays and their accessories, the products are cut on site to create changes of direction, adjust sections, etc.
