

Price of Horizontal Fan-Shaped Cable Trays

Article Overview

Horizontal fan-shaped cable trays typically range from \$20 to \$150 per unit, depending on material, size, and supplier.

Horizontal fan-shaped cable trays, also known as horizontal bends or elbows, are used to route cables at angles in cable tray systems, maintaining organized and safe cable management . Prices vary significantly based on material (steel, stainless steel, aluminum, or fiberglass reinforced plastic), size, and load capacity. For example, lightweight aluminum or FRP trays are generally more expensive than standard galvanized steel due to corrosion resistance and electrical non-conductivity .

Factors Affecting Price

- o Material: Stainless steel and FRP are higher-priced due to durability and resistance to harsh environments, while hot-dip galvanized steel is more economical .
- o Size and Angle: Larger trays or wider fan angles require more material and are priced higher.
- o Supplier and Location: Prices differ by region and supplier. Indian suppliers on IndiaMART list multiple manufacturers for horizontal bend trays, and contacting them directly is recommended for quotes .
- o Quantity: Bulk orders often reduce per-unit cost, while small orders may incur higher prices.

Sourcing Tips

- o Check suppliers like IndiaMART, RS Hong Kong, or Graybar for availability and quotations .
- o Specify material, dimensions, and load requirements to get accurate pricing.
- o Consider installation and maintenance requirements, as open trays provide better airflow and easier access for future cable additions . In summary, while the typical price range is \$20-\$150 per unit, the exact cost depends on material, size, and supplier. For precise pricing, it is best to request a quote from multiple suppliers with your specific requirements.

Fast installation with dependable support. Everything you need to build a cable management system, including Cablofil wire mesh

A cable tray system is used to support insulated electrical cables used for power distribution, control, and communication. Cable
