

Article Overview

Nordic cable tray prices vary depending on material, size, customization, and installation requirements, with X-Tray being a premium, high-quality option.

Product Overview

Nordic Wire Tray offers the X-Tray series, a premium cable tray system designed for flexibility, high load capacity, and easy installation . The trays are available in multiple materials and surface treatments, including stainless steel, which affects durability and cost . X-Tray is designed with the longest bracket spacing in the market, reducing the number of parts and installation time, which can lower overall project costs .

Factors Affecting Price

- o Material and Surface Treatment: Stainless steel or coated finishes are more expensive than standard steel options .
- o Tray Size and Load Capacity: Wider or heavier-duty trays cost more due to additional material and structural requirements .
- o Customization: Custom lengths, bends, or special configurations increase cost compared to standard stock items .
- o Installation Efficiency: Fewer fasteners and simplified assembly (M8 bolts, minimal tools) can reduce labor costs, indirectly affecting total project expenditure .
- o Order Volume: Larger industrial orders may benefit from bulk pricing, while smaller retail or project-specific orders may have higher per-unit costs .

How to Obtain Pricing

Since exact prices are not publicly listed, the best approach is to:

- o Contact Nordic Wire Tray directly via their website to request a quote for your specific project .
- o Provide details such as tray type, material, length, load requirements, and any customization.
- o Consider shipping, lead time, and after-sales support when evaluating total cost .

Additional Considerations

Nordic Wire Tray emphasizes high-quality, long-lasting products that comply with IEC 61537 standards, which may justify a higher upfront cost but reduce maintenance and replacement expenses over time . Their trays are also designed for fast installation, which can save labor costs on large projects . For accurate pricing tailored to your project, it is recommended to request a detailed quote from Nordic Wire Tray, specifying your installation requirements and desired materials.
