

Serbia Overseas Warehouse Cold Aisle Waterproof Type

Article Overview

Serbia offers modern cold storage warehouses with precise temperature control, waterproof construction, and specialized cold aisle solutions suitable for overseas logistics.

Cold Storage Facilities in Serbia

Trane Serbia provides containerized cold storage solutions with temperatures ranging from +60°C to -40°C, and ultra-low temperature options down to -70°C. Their units are fully electric with optional diesel backup, remote monitoring, and precise temperature control (+/- 0.25°C in chilled mode, +/- 1°C in frozen mode), making them suitable for sensitive products and cold aisle operations. These containers are lightweight, compact, and available in multiple sizes, ideal for both short-term and long-term storage. Euro Line operates modern cold storage near Kragujevac, with minus mode storage up to -20°C and positive temperature storage above 0°C. The facility includes a shock chamber, processing area, and pallet storage for goods not requiring cooling. They also provide export logistics for countries outside the EU, making it suitable for overseas shipments. TLS Serbia offers a logistics center near the E-70 highway with 43,000 pallet spaces, equipped for unloading, transshipment, and handling of containerized goods. Their warehouses feature 24-hour CCTV, automatic fire protection, and WMS digital management, ensuring secure and efficient cold aisle operations. SENA Cold Rooms specialize in tailor-made cold rooms for positive (0-8°C), negative (-18 to -25°C), and combined temperature regimes, including ULO (Ultra Low Oxygen) and DCA (Dynamic Controlled Atmosphere) systems. These rooms are designed with hermetic sealing, waterproof thermal-insulated panels, and high-quality refrigeration doors, ensuring prolonged storage and protection against moisture, making them ideal for sensitive fruits, vegetables, meat, and dairy products.

Key Features for Cold Aisle and Waterproof Storage

- o Temperature Control: Precise regulation from ultra-low to ambient conditions.
- o Waterproof Construction: Thermal-insulated panels and hermetic sealing prevent moisture ingress.
- o Cold Aisle Optimization: Containerized or warehouse layouts designed for airflow management and energy efficiency.
- o Remote Monitoring: Real-time tracking of temperature and humidity for sensitive goods.
- o Export-Ready: Facilities with customs coordination and logistics support for overseas shipments. These facilities in Serbia provide flexible, high-quality solutions for companies needing overseas cold storage with waterproof and cold aisle capabilities, suitable for food, pharmaceuticals, and other temperature-sensitive products.
