

Article Overview

Pinanson and FIBERCO are leading Spanish manufacturers of fiber optic splice boxes, offering both standard and customized solutions for telecommunications and industrial networks.

Key Manufacturers in Spain

1. Pinanson Pinanson produces fiber optic distribution and splice enclosures, including lockable aluminum boxes with multiple SC connectors. Their products are suitable for professional installations, such as sports facilities and industrial networks. They offer customization options including color, direct printing of logos or text, and powder electrostatic coating for durability . 2. FIBERCO FIBERCO is a Spanish manufacturer with over 25 years of experience in fiber optic solutions. They provide standard and bespoke splice boxes, along with field and laboratory testing equipment. Their services include network verification, error detection, fiber splicing, and polishing, ensuring high reliability for telecommunications, energy, and industrial applications. FIBERCO maintains ISO9001:2015 certification and offers technical support and on-site assistance . 3. Other Notable Spanish Suppliers

- o Lightmax SL: Specializes in passive optical fiber network products and splice enclosures.
- o Beyondtech Europe SL: Offers high-quality optical products and installation services in Madrid.
- o Fibrafusion: Focuses on installation, splicing, and certification of multimode and singlemode fibers .

Considerations for Choosing a Manufacturer

When selecting a Spanish fiber optic splice box manufacturer, consider:

- o Customization capabilities: Ability to produce boxes with specific port densities, colors, or branding.
- o Certifications and quality standards: ISO certifications and compliance with IEC standards.
- o Technical support: On-site assistance, network verification, and troubleshooting services.
- o Experience in specific sectors: Telecommunications, energy, or industrial networks. These manufacturers provide high-quality, locally produced splice boxes with short lead times and flexible configurations, making them suitable for both standard and specialized fiber optic network projects in Spain.
