The IEC (International Electrotechnical Commission) and BS 7671 (British Standard for Electrical Installations) both provide essential requirements for electrical installations, including those for fuse boards like garage unit, consumer unit and distribution board. NEC Article 314 establishes requirements for the installation and use of electrical boxes, conduit bodies, fittings, and handhole enclosures. A conduit body is a removable-cover section of a conduit system that provides access at junctions or termination points. Article 314 applies to: These. This reticulation standard is a sole property of REG and is a guideline to REG field staff and contractors when executing power line construction and maintenance. The RICS Rules of Conduct set high-level professional requirements for the global chartered surveying. Originally published as a guidance note in 2013 this document has been rewritten as practice information, so as to account for changes in legislation, case law and construction contracts introduced since 2013. This practice information is aimed at construction professionals who manage the. The Group's environmental commitment is centred on 3 guiding lines: taking on board environmental management in the running of its industrial sites, reducing the environmental impact of its products by eco-design, providing environmentally friendly solutions that contribute to energy savings.
