

Article Overview

The price of power distribution boxes in Switzerland typically ranges from CHF 50 to CHF 500, depending on capacity, features, and supplier.

Price Range and Factors

Distribution boxes in Switzerland vary widely in price based on current rating, number of circuits, indoor/outdoor suitability, and additional safety features. For example, Konner & Sohnen offers distribution boards suitable for up to 7 device groups with a maximum current of 32A, designed for both indoor and outdoor use, with prices generally starting around CHF 50-100 for basic models and reaching CHF 400-500 for larger or more advanced units with integrated circuit breakers and sockets . Other factors influencing price include:

- o Material quality: High-quality components ensure long service life and protection against overloads and short circuits.
- o Capacity: Larger boxes supporting more circuits or higher amperage cost more.
- o Supplier type: Prices may differ between manufacturers, wholesalers, and online retailers .
- o Additional features: Integrated sockets, surge protection, and grounding bars can increase cost.

Purchasing Options

Swiss buyers can source distribution boxes from:

- o Local online retailers like Konner & Sohnen
- o Manufacturers and suppliers listed on ExportHub, which includes 78 manufacturers and 65 suppliers in Switzerland
- o Electrical wholesalers for bulk or specialized orders

Additional Considerations

While the distribution box price is a one-time purchase, grid tariffs and electricity costs in Switzerland are separate and depend on local utility providers, usage, and regulatory fees . For residential or commercial installations, it is important to consider installation costs, compliance with Swiss electrical standards, and potential future expansion. In summary, expect to pay between CHF 50 and CHF 500 for a Swiss power distribution box, with the final price determined by capacity, features, and supplier choice.
