Companies such as FM Logistic Russia and C. Robinson Russia are integrating Internet of Things solutions and predictive analytics to monitor stock levels, optimize storage layouts, and enhance operational efficiency in warehouses near Novosibirsk and Kazan. Import substitution programs have reshaped the supply base: domestic producers now supply an estimated 65-75% of standard low-voltage distribution boards, enclosures, and modular devices by volume, though reliance on imported raw materials and electronic components persists. China has become the. What is a Distribution Box? A distribution box, or DB box, is a circuit breaker enclosure. It is a vital part and central hub of any electrical system. The hub distributes electrical power from a single input source to various circuits throughout a building. Whether it's a home, office, or factory. Russia Smart Warehousing is anticipated to grow at 9. 87% CAGR from 2026 to 2031, driven by infrastructure development and automation.
