

What is a fireproof cable tray support

Preview

Fire resistant fixing system to hold cables in place in a fire, stopping them from becoming a hazard A fireproof cable support system. Meka Pro has tested and continues to test its products and cable management systems' fire resistance with the cables installed and connected according to the temperature curve in the EN 1363-1. Electrical fires can spread rapidly through the cables within a tray system, which is why choosing the right material for your cable tray is paramount in reducing the risk. Consists of a foiled, U-shaped bracket with metal keyhole. If there is a cable tray penetrating through a fire rated wall that is supporting services, then consideration should be given to how this may affect the fire safety of a building. Penetrations through fire walls present a risk to the containment of the spread of fire and should be protected with. The resulting barrier retards the transmission of smoke, fire, and toxic gases from spreading between adjacent rooms and floors for the rated time period.
