

What is an FAP distribution box

Preview

The PPC Fiber Access Point (FAP) is designed to splice and interconnect fiber optic cables, and is suitable for FTTH applications in multi-dwelling buildings. This box is light weight, is small in size and is perfect for routing fiber. The FWME1BL accommodates all Panduit Opticom fiber adapter panels (FAP), cassettes, connectors and patch cords with integral cable management, multiple cable routing options and finishing capabilities. Holds (1) Opticom FAP or Cassette. The fiber splicing, splitting, distribution can be done in this box and meanwhile it provides solid protection and management for the FTTX network building, cable, terminations, cassettes, splices, connectors and patch cords.

The FAT2808SD-8 and FAT2808SD-16 are outdoor devices that output 8 and 16 pre-connected drop cables respectively at the user access nodes. When the
