

What router should I use for a 300Mbps fiber optic connection from a telecom company

Preview

The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. I worked with the Cybernews research team to review and compare different routers and give. Popular internet service providers (ISPs) such as Cox, Spectrum, Xfinity, and fiber-optic providers like AT&T offer faster Internet speeds for expansive home WiFi networks. Whether you're streaming, gaming, or working from home.

In this guide, we'll unveil the top contenders for the title of the best router for 300Mbps internet speeds. Whether
