

What router should I use for a 6M fiber optic connection

Preview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. Having tested all these options myself, I know speed and security are your top priorities. The bottleneck in your home network isn't the fiber drop -- it's the LAN ports and Wi-Fi generation on the box sitting in your closet. I've compiled the 15 best routers for fiber internet in 2026, including models like the NETGEAR Nighthawk WiFi 7 Router (BE9300), TP-Link Deco X55.
