

Article Overview

The price of Xiuning Energy-Saving Cable Trays varies based on material, size, load capacity, and customization, typically requiring direct supplier quotation for accurate figures.

Pricing Factors

The cost of energy-saving cable trays depends on several key factors:

- o **Material Type:** Options include galvanized steel, hot-dipped zinc, stainless steel, aluminum, and glass fiber reinforced plastic (FRP), with galvanized steel generally being the most economical and stainless steel or FRP offering higher durability in harsh environments .
- o **Tray Type and Design:** Common types include wire mesh, perforated, trough, ladder, combined, and large-span trays. Complex designs or large-span trays may increase costs due to additional material and manufacturing requirements .
- o **Dimensions and Load Capacity:** Tray width, depth, and length, along with the load-bearing capacity, directly influence pricing. Larger or heavier-duty trays require more material and stronger support structures .
- o **Customization and Finishing:** Custom shapes, bus ducts, and coatings (e.g., sprayed or fireproof finishes) can affect the price. Custom orders may also impact lead time .
- o **Installation and Maintenance Considerations:** Modular designs and easy assembly features can reduce labor costs, which is often factored into the overall pricing strategy .

Supplier Information

Xiuning Energy-Saving Cable Trays are produced by manufacturers such as TONGZHOU MACHINERY, which has advanced production lines including one-time molding, laser cutting, welding, and galvanizing. The factory can provide OEM/ODM services, pre-production samples, and final inspection before shipment. Typical delivery times range from 15 to 30 days after advance payment, with payment terms often structured as 30% T/T in advance and 70% before delivery .

How to Obtain Pricing

Since prices vary based on specifications and order quantity, the most reliable way to get an accurate quote is to contact the supplier directly. You can provide details such as:

- o Required tray type and dimensions
 - o Material preference
 - o Load capacity and environmental conditions
 - o Quantity and delivery location
- Suppliers can then provide EXW, FOB, CIF, or DDP pricing depending on
